Crocodylia

The main visual differences are that alligators have a broader snout and crocodiles show both sets of teeth when their mouths are closed. Crocodiles hunt larger prey, such as sharks and large mammals such as buffaloes, apes, and even humans. This can result in more frequent alligator-human interactions, and a greater potential for conflict.

What Is The Difference Between An Alligator and A Crocodile?

Now these are just modified saliva glands that allow crocodiles to excrete large amounts of salt from their surroundings, such as the water they are in.
