## Critical Pragmatics: An Inquiry into Reference and Communication

Though I am speaking now, I might have remained silent Kaplan 1989a: 509. Some relationship labels are primitive predicates such as MAKE, BEHAVE, or USE while others are examples of the relationship such as GARDEN, PITY, or PLASTER. Finally, the fourth section offers a preliminary predictive model based on the available data.

## Names (Stanford Encyclopedia of Philosophy)

Though we are certainly not at a loss in deciding the proper precedent for any particular case, it is difficult to say in general and with precision which applications should count. Suppose we could craft a version of the cluster theory that was materially correct it satisfies all of our intuitions about the reference of the name in different eventualities.

## Critical Pragmatics: An Inquiry into Reference and Communication

This brings us to a circularity objection brought against the metalinguistic view Strawson 1950: 340; Kripke 1980: 68—70.

## Critical Pragmatics: An Inquiry into Reference and Communication

However, the metonymy can be decomposed into two parts which combine at the step 2 level: instrument for action + cause for effect.

## What is in a Name?

Bertrand: Cii No, that's false because there are two senators from California. The pragmatics of possession: A corpus study of English prenominal possessives. By producing your utterances so that it is heard, you provide the hearer a succession of cognitive fixes on the referent, that is the person of whom wanting the salt is being predicated.

### **A comparison of the formation of some Continental and early Insular Celtic personal names**

Furthermore, despite the fact that this borough is called the Bronx, we do not refer to it using an expression that combines a phrase that expresses this metalinguistic property with a definite determiner, as the compositional theory would predict.
