

# Distance geometry and molecular conformation

Research Studies Press - A Generative Model for Molecular Distance Geometry

Description: -

- Conformational analysis.

Distance geometry.

Stereochemistry. Distance geometry and molecular conformation

-

15

Chemometrics series ; Distance geometry and molecular conformation

Notes: Includes bibliographies and index.

This edition was published in 1988

Filesize: 38.69 MB

Tags: #Unassigned #distance #geometry #and #molecular #conformation #problems

## CiteSeerX — Citation Query Distance geometry and molecular conformation

A Structural formulae of a random selection of molecules from the Conf17 dataset. Numerical results are included which illustrate the efficiency and robustness of our approach. In the 3D structure of the molecule, carbon and oxygen atoms are colored gray and red, respectively.

### DG

The program is validated on the Astex dataset, the ChemBridge Diversity database and on a number of small molecules with known crystal structures extracted from the Cambridge Structural Database.

### Unassigned distance geometry and molecular conformation problems

In particular, we introduce a primal-dual interior-point algorithm that solves an equivalent quadratic objective function semidefinite programming problem SDP. The CVAE model is illustrated in Fig.

### DG

Welling 2014 Auto-Encoding Variational Bayes. We conclude with a discussion of localization in sensor networks where the sensors are placed randomly. The results show that the new free program DG-AMMOS is a very efficient 3D structure generator engine.

### Unassigned distance geometry and molecular conformation problems

Marsolier J, Perichon M, DeBarry JD, Villoutreix BO, Chluba J, Lopez T, Garrido C, Zhou XZ, Lu KP, Fritsch L, Ait-Si-Ali S, Mhadhbi M, Medjkane S, Weitzman JB.
