Injection, laboratory tests to monitor the effects of treatment with this drug and the patient's condition should be done. Pediatric Use: See INDICATIONS AND USAGE. This retention responds characteristically to diuretic agents if adequate renal function exists.

### Character Stats and Hyper Stats

Cataracts have been observed in a few animals receiving repeated daily doses of intravenous diazoxide. Diazoxide was approved for medical use in the United States in 1973. Minibolus administration usually provides a more gradual reduction in blood pressure and thus may be expected to reduce the circulatory and neurological risks associated with acute hypotension.
