The Rotaliida (Larger)

Different species of birds have different distributions but certain patterns are seen over and over again.

Shorebirds wintering in Southeast Asia demonstrate trans

Foraminiferida: Nummulitidae from the lower Oligocene of Sicily and Aquitaine: A possible transatlantic immigrant.

Western Eurasian genetic influences in the Indonesian archipelago

The Dutch who were Protestants persecuted the Catholics the left-over Portuguese settlers but left the Buddhists, Hindus and Muslims alone. That country was composed of many different ethnic states. This would inspire a propaganda movement in Spain, organized by Pilar, Rizal, and Ponce, lobbying for political reforms in the Philippines.

The avian fossil record in Insular Southeast Asia and its implications for avian biogeography and palaeoecology [PeerJ]

One such barrier is the Himalayan mountain range, which extends 2400 km in an east—west direction in southern Asia. The resulting PCA plot is shown in. It is said that more than 19 dynasties belonging to Indian origin ruled over the region for more than 11 centuries.

Palaeoenvironments of insular Southeast Asia during the Last Glacial Period: a savanna corridor in Sundaland?

Amphistegina mammilla Fichtel and Moll 1798 ; Fig.

Shorebirds wintering in Southeast Asia demonstrate trans

The paradox of extreme high-altitude migration in bar-headed geese *Anser indicus*. Pork was forbidden to Muslims, a significant development in areas like eastern Indonesia and the southern Philippines where it had long been a ritual food.

Southeast Asian biodiversity: an impending disaster

The Sinhalese were greatly affected by the administrative policies of the British and were not used to being ruled by a king who lived far away in another continent. The haplogroup ages obtained from the Bayesian MCMC analysis tended to give slightly older time frames compared with the ML estimates and this may be attributed to the differences between Bayesian and ML methods.
