Poland Economic Growth 1995

The potential compensation imposed on banks for the holders of foreign currency denominated mortgages may further reduce profitability. The assumptions reflect the latest Eurostat population forecast Europop 2013, published in spring 2014 and the short-term macroeconomic forecast produced by the European Commission in November 2014.

5 Economic Trends to Watch in 2021

Business sentiment in the manufacturing sector deteriorated in October, likely owing to the rapidly increasing number of new Covid-19 cases, which could weigh on activity in the final months of the year. The country's main industrial sectors are machine manufacturing, telecommunications, environment, transport, construction, industrial food-processing and IT.

Poland: Skills forecasts up to 2025

Their budgets have been severely weakened by the pandemic, and depending on the size of the city, the deficit may be as high as hundreds of millions of zlotys. An Aging Society Poland's more rapidly than that of any other European country. For the geographical distribution of the infection within the country, visit the in Polish.

Poland Overview

Its overall score has increased by 0. All travelers need to pay close attention to the conditions at their destination before traveling.

5 trends that will shape economic development in Poland in 2018 and beyond

Often, replacement demand provides more job opportunities than expansion demand, which means that there will still be job opportunities even if the overall level of employment falls. For a few countries where the official exchange rate does not reflect the rate effectively applied to actual foreign exchange transactions, an alternative conversion factor is used.

5 Economic Trends to Watch in 2021

The country is also planning to invest in social initiatives, which can stimulate spending but can also stall investment. The inevitability of the green transformation is already being seen by European and, among them Polish, giants of the energy and fuel sector investing in renewable energy sources and hydrogen technologies, who are changing their strategies in this respect.

Five trends that will change the Polish and European economy

In the second quarter of 2020, however, the spread of COVID-19 and the restrictions that followed caused a real GDP contraction of 8. Inflation is set to ease due to continued, though diminishing, spare capacity.

Poland Economic Snapshot

This has pushed Poland further away from free market principles towards a model of state capitalism.
