## Feedback of Slow Cortical Potentials: Basics, Application, and Evidence

The N400 shows a good deal of promise as a means of evaluating the intactness of a patient's semantic networks in a variety of neurological and psychiatric syndromes.

### Brain

In Experiment 2, a startle probe paradigm was used. Keil, in , 2012 Abstract Event-related potentials ERPs are derived from electroencephalographic EEG measurement of neural activity.

### Operant control of EEG and event

Biofeedback procedures have been used successfully as a scientific tool to achieve systematic variations on a psychological level and to record psychological covariations. ERSPs have found a place in differential diagnosis of apparently borderline psychotic states.

### Brain

This chapter explores the findings obtained in event-related slow potentials ERSPs investigations of adult psychiatric patients. By continuing you agree to the. A comparable progress has been achieved for the operant control of slow potentials DC-shifts across seconds.
