They suggest that future research should explore these avenues instead of trying to find the elusive starting point of the human story. Well, I haven't found one. Maya civilization arose as the gradually declined.

Neolithic Revolution

The reason I give this book a 1-star rating is because it was not an enjoyable book to read and it had no interesting parts or information in it. This pattern basically took form: I kept reading either to relive a time in history I had already researched, or because I felt like a moron for not knowing anything about something, such as the origins of Islam. China's Cosmopolitan Empire: The Tang Dynasty.

The next incarnation of marriage began in the 18th century with the rise in Europe of democratic political institutions, which argued that everyone was entitled to personal freedom—and by extension, the freedom to marry the person of their choice.

The Human Story: Our History, from the Stone Age to Today by James C. Davis

The use of the term here includes both Ages under a single all-inclusive time-frame. Davis takes us on a journey to ancient times, telling how peoples of the world settled down and founded cities, conquered neighbors, and established religions, and continues over the course of history, when they fought two nearly global wars and journeyed into space.
