Design and synthesis of analogues of natural products

First total synthesis of astin G.

Research

We have been addressing this long-standing challenge in the field through experimental and computational studies of silver-catalyzed nitrene transfer chemistry, where the diversity of coordination geometries in Ag I complexes enables unique and tunable chemo-, regio- and stereoselectivities in transformations of C-H bonds to new C-N bonds. SYNTHESIS AND PROPERTIES OF FLUORINE-CONTAINING HETEROCYCLIC COMPOUNDS. Simple Reagents for Direct Halonium-induced Polyene Cyclizations.

David Berkowitz

Synthesis of 1 α ,25-dihydroxy-16-ene-vitamin D₃ and C-20 analogues.

Madeleine M. Joullie

Chemical Reviews 2005, 105 12 , 4707-4729.
