Series Title: Responsibility: Granino A. By concisely tabulating related formulas and omitting proofs, the authors have packed a remarkably large amount of material into a single, handy volume. In the case where the SRT is zero, the results well agree with the ones obtained by using the simulation software package LS-DYNA.

These problems were chosen to illustrate not only how to solve various algebraic and differential equations but also how to interpret the solutions in order to gain insight into the behavior of the system modeled by the equation. Organized in ascending order of complexity, the material is divided into two parts. Linear, Quadratic, Cubic, and Quartic Equations; 1.
