What Life Was Like in America 100 Years Ago

Medical authorities at the time recommended large doses of aspirin of up to 30 grams per day. Morbidity associated with smallpox and polio caused by wild-type viruses has declined 100% and nearly 100% for each of the other seven diseases. Some become grandparents when they are relatively young and in the workforce, while others, because of the later age of parents at the birth of their first child, may be retired or approaching retirement.

How Has Childbirth Changed in This Century?

These working conditions are often far more hazardous than those in other industries, the group says. The effects of parental drug use: Children in kinship care: A review of the literature. While hunter-gatherers skillfully harvested what nature had grown, farmers had to plow, plant, cultivate, tend their flocks, and so on.

How death has changed over 100 years in Britain

For girls under 15, the rate is five times higher, according to UCLA's findings. Many thousands of them died each year of diseases, starvation, and exhaustion. Childbearing is generally safe and does not represent illness or disability.

Achievements in Public Health, 1900

During the 20th century, substantial achievements have been made in the control of many vaccine-preventable diseases.

A Brief History of Education

The consequences can be devastating

Childhood and Society a Hundred Years Ago / by Jean S. Heywood by Heywood, Jean Schofield: (1969) 1969 Edition.

The labor of children was moved from fields, where there had at least been sunshine, fresh air, and some opportunities to play, into dark, crowded,

dirty factories. Washington, DC: US Department of Health, Education, and Welfare, Public Health Service, National Center for Health Statistics, 1968.
