Key Concept: Learning Communities

When compared to more traditional methods where students non-interactively receive information from a teacher, cooperative, problem-based learning demonstrated improvement of and retention of classroom material. This norm of openness is essential and underlies transformational change.

Shared Education

These communities enable participants to share results and learn from each other, thereby improving their ability to achieve rapid yet significant progress. The particular strategies that are used will depend on the ages of the participants and purpose of the learning circle, but helping participants to understand the relationship between learning and identity is often a good place to start. Kenneth Bruffee performed a theoretical analysis on the state of higher education in America.

The Shared Learning Trust

Simply including more interdependent activities will help the students become more engaged and thoughtful learners, but teaching them that obtaining knowledge is a communal activity itself.

Shared Learning Association of Chapel Hill

Innovative creative thinking is a highly valued skill, but there is little consensus about how one develops these skills.
