This phenomenon has a vast bearing on the understanding of complications facing the SATVLA which will be discussed latter.

Circulars 1970

On Saturday, 11th November 2006 the last private charter train for overseas tour operator Penguin Tours ran as empty coaching stock from Nelspruit to Braamfontein yard in Johannesburg. The question of keeping duplicate and triplicate spares all over the Union as referred to in your letter of 26 May is a matter which ordinarily might be cited as a reason for insisting on the retention of certain types to specified areas, but at the present time when the utmost must be got out of the available engine power, I think, while adhering to the general principle, we will have to sacrifice a little in getting traffic moved, which, after all, is the prime factor in the existence of Railways.

Sequence stratigraphy of the Vaal Reef facies associations in the Witwatersrand foredeep, South Africa

No mixing with mine water is evident here. TIMELINES - According To Geological History 1 TVL SEQUENCE laid down 2,300 million years ago. The SATVLA karst lends itself to the creation of the CHK WHS, due to the nature of the sedimentary karstic processes that were laid down some 2300 million years ago.
