### What is Arts in Health?

A wide variety of topics will be covered including ambient music and meditative sound, individual and choral singing and rhythm based practices such as drumming.

### An introduction to the new WHO evidence report on arts and health

Covering the findings from over 3,500 published studies, the report aims to give an overall picture of the role the arts play in supporting health globally. Amongst the many topics you will have the chance to explore the role of dance in supporting individuals with Parkinson's Disease, the expressive practice of Authentic Movement and new practices in contemporary dance that explore non-traditional approaches.

### An Introduction to Structural Health Monitoring

Use the following links to learn more about our educational offerings: This online professional development course serves as a basic introduction to the field of arts in health. Leading professionals from a range of public health organizations will be engaged in the course to enhance student exposure, networking and opportunities.

### An introduction to the new WHO evidence report on arts and health

The findings are illustrated with a selection of case studies from across the WHO European region, and presented alongside a series of policy options for how to support the development practice and research internationally.

### Arts and Health

We also explore the role of stakeholders such as water utilities, NGOs, civil society, and support agencies such as UNDP, and WHO.

### An introduction to the new WHO evidence report on arts and health

Town Hall that was held on December 3. The course will also include the development of a human subjects research protocol.

## **Respiratory System**

Spring 2022 This class will give you the opportunity to build upon your learnings over the past 2+ years as Public Health majors. If that reserve is used up and additional oxygen is unavailable then death is the obvious outcome.
