Reengineering the corporation : a manifesto for business revolution (Book, 1993) [spaceneb.us.to]

After a quarter of a century we wish to see the unique and originally temporary system of direct rule ended and a successful restoration of local accountable democracy achieved. Social workers working with children will receive special training to cope with the often heart-rending cases they face.

Dyke Manifesto

Over the next seven years, Kaczynski sent nine homemade pipe bombs to multiple targets, including executives at American and United airlines and academic administrators, injuring several people, some seriously. Princeton, NJ: Princeton University Press, 1990. We will also remove the remaining legal obstacles to the controlled exchange of confidential information between the police and the regulators in this kind of case.

Filesize: 36.59 MB

Within 12 months, we will end the scandal of primary school classes of over 40 children. Personal prosperity and property ownership are not selfish or inward-looking. We will continue to support Britain's defence industry, and we will work with companies to identify the technologies of the future.

Culture Jamming: Hacking, Slashing, and Sniping in the Empire of Signs

Every child needs a good grounding in science and technology. Early in the next Parliament we will introduce a Social Services Reform Bill which will create a new statutory framework for social services. Everyone else wants to learn from our vision of a smaller state doing fewer things and doing them better.

1992 Labour Party Manifesto

At the start of the next parliament we will set out proposals to provide all young people entering the workforce with a personal pension fund paid for through a rebate on their national insurance contributions.

1997 Conservative Party Manifesto

Our language, our heritage of international trading links, our foreign investments - second only to America's - are historic strengths which mean we are ideally placed to seize the opportunities of the global economy. Business must have a high level of education science and skills.

Unabomber (Ted Kaczynski)

We believe that fishermen should have more say in decisions affecting their industry. We will press the European Commission to establish regional committees to give fishermen a direct influence in fishing policy. These are the industries that will benefit from opening up trade around the world. FIFTH: Humanism asserts that the nature of the universe depicted by modern science makes unacceptable any supernatural or cosmic guarantees of human values.
