Man Needs the Environment

This role is becoming of increasing importance as human life becomes more deeply influenced by technology and therefore more remote from man's evolutionary experience. An indicator reflecting the loss of nitrate to groundwater would be effect-based. A December 2020 study published in found that human-made materials, or anthropogenic mass, exceeds all living on earth, with alone outweighing the mass of all terrestrial and marine animals combined.

Dubos >> Man's Nature and Man's History

By reducing transportation emissions globally, it is predicted that there will be significant positive effects on Earth's , , and climate change. Here, there are no fathers, no brothers, no friends.

Most Important Animals To Humans (& Ecosystems)

However, irrigation can also be used, together with soil drainage, to overcome soil salinization by leaching excess salts from the vicinity of the root zone.

The Iceman's Belt

By adding to the knowledge of man's biological nature, science helps the humanist better to understand the human condition, and to define the good life.

Dubos >> Man's Nature and Man's History

The Annihilation of Nature: Human Extinction of Birds and Mammals. Frontiers in Forests and Global Change.

D. F. Roberts, Survival

Man and his culture evolved, simultaneously, as it were, through a complex series of feedback processes. The term is sometimes used in the context of produced from human activity since the start of the but also applies broadly to all major human impacts on the environment.
