Gaining increasing fame from his concrete constructed buildings, Ransome was able to build two of the first reinforced concrete bridges in North America.

Arching or compressive membrane action in reinforced concrete slabs

The most common durability failures in an outdoor climate are due to reinforcement corrosion or frost attack.

Reinforced Concrete Design

Must be able to perform the function, it is built for.

Types of Loads on Structures

If the reinforcement is too close to the surface, early failure due to corrosion may occur. Designing and implementing the most efficient floor system is key to creating optimal building structures. In most of these mentioned situations, service life longer than 100 years will be required but these periods significantly exceed the current conventional service life design.
