The device used is similar to one which forms the topic for one of Grienberger's most spectacular mathematical Problemata, dating from 1603. Private Lessons On 15 September 1590, Grienberger, then mathematics teacher and student of theology at the Jesuit College in Vienna, wrote the earliest of his surviving letters to Christoph Clavius in Rome. In addition to giving America its name, it was also the first map to portray the New World as a separate continent — even though Columbus, Vespucci, and other early explorers would all insist until their dying day that they had reached the far-eastern limits of Asia.
