## What are archives?

As a result, it may be harder to find, and may have to be converted in some way once you do find it. Drawing from a set of international locations, the resources address issues of theory, policy, preservation, standards, access and technology, creating a rich collection of resources for those interested in understanding and using archival materials.

## Archival appraisal

Some, within the field, like Tyler O.

## Research Discovery Experience

Under some circumstances, applications may not require review by NJSHRAB, but potential applicants should verify that with the State Coordinator or NHPRC staff as early in the grant-writing process as soon as possible.

## Archival interventions: participatory research and public historical geographies

Color photography is not acceptable. IFLA 36 2 , 145-154. Morris, PhD George Washington University Washington, D.

## What are archives?

As more and more ethnographic materials are made available online, it is important to understand how this impacts resource allocation within institutions, building or changing expertise of institutional staff, and work practices associated with these collections. Retrieved September 5, 2005, from Rainer, Hubert. Generally, Level I documentation is required for nationally significant buildings and structures, defined as National Historic Landmarks and the primary historic units of the National Park Service.

## **Archival interventions: participatory research and public historical geographies**

They can come in a wide range of formats including written, photographic, moving image, sound, digital and analogue. The recommendations offer a viable, albeit challenging, agenda for an issue of substantial importance to archivists during the coming decade.

### **Research Discovery Experience**

This might be a group from the same population that signed up for but did not experience the program, or another comparable community in a different place. Electronic Library 11 2 : 108-109. Food and Drug Administration approves the first blood test to detect the virus that causes AIDS.
