

# Assessment of the interconnection between Tampa Bay and the Floridan aquifer, Florida

U.S. Dept. of the Interior, Geological Survey, Water Resources Division - Assessment of the interconnection between Tampa Bay and the Floridan aquifer, Florida

Description: -

- Water quality -- Florida -- Tampa Bay.

Saltwater encroachment -- Florida -- Tampa Bay.

Aquifers -- Florida. Assessment of the interconnection between Tampa Bay and the Floridan aquifer, Florida

-

2

International Union of Crystallography monographs on crystallography ;

Water-resources investigations -- 82-54Assessment of the interconnection between Tampa Bay and the Floridan aquifer, Florida

Notes: Bibliography: p. 47-50.

This edition was published in 1983

## Florida's vanishing springs

The clay layers form local confined conditions within the aquifer.

## Assessment of the interconnection between Tampa Bay and the Floridan aquifer, Florida

The intermediate aquifer system includes all water-bearing units and confining units between the overlying surficial aquifer system and the underlying Floridan. ... Radioisotope measurements were used in a steady-state model, a non-steady state model and an exit point model to calculate SGD rates into the lagoon.

## Assessment of the interconnection between Tampa Bay and the Floridan aquifer, Florida in SearchWorks catalog

However, the groundwater-derived nutrient loads had not yet been thoroughly quantified. At such time as either of the conditions set forth in sub-sub-subparagraph 6003 ii C. In addition, the City shall submit a quarterly written report of all activities and all progress towards timely completion of its elements of the recovery strategy.

## Hydrogeology of Florida

We determined the isotope signatures in macrophytes and phytoplankton via particulate organic matter and in the potential sources of inorganic nitrogen and carbon in two coastal lagoons on the French Mediterranean coastline. To separately quantify the roles of fresh and saline SGD, relative to that of rivers, in transporting water and nutrients to Tampa Bay, we have used three approaches to estimate rate of SGD from the Pinellas peninsula.
