

Outcomes-based care delivery

W.B. Saunders - Outcomes

STRATEGIC AREA	BOARD MEMBERS	PATIENTS	HEALTH PLANS AND PROVIDERS
Organize into integrated provider units	Lead the organization and care across the continuum and build a basic strategy	Expect care from providers that offer high-value, experienced, reliable, and efficient care that provide integrated care from high-value providers	
Measure outcomes and costs for every patient	Commit to continuous improvement and measurement and a basic strategy	Expect data on the full set of outcomes that measure quality and costs of care	Expect improvement and reporting of outcomes and costs of network membership and participation in performance enhancement by condition and provider and their facilities
Develop bundled prices for care cycles	Charge management and providers for bundled payments and working conditions and working to roll them out	Expect care from providers that offer bundled payments and who offer predictable and consistent care with those of peers	Adaptation of the SHIP to predict care conditions and providers and revised billing yes same bundled payment
Integrate care delivery systems	Make an organizational commitment to best practices and working conditions and working to roll them out	Expect care at the appropriate level of care for each key care that is provided by the right provider with a clear leader	Reimbursement for care on the basis of the quality and cost of care for the patient and the provider and the assessment of where care is actually delivered
Grow excellent services across geography	Expect areas of excellence across geography and work with allies or affiliations	Expect care from providers that offer high-value providers for specific conditions and even if the provider or plan fails to deliver	Expect networks on high-value providers to develop value and reliability and reward them for using evidence-based care sharing best practice with clinicians
Build an enabling information technology platform	Make a long-term investment in IT that supports high-quality, patient-centered care	Expect providers to have access to high-quality, up-to-date patient information and medical record, tools for self-care, and support, and timely renewal, and communication with clinicians	Expect networks on high-value providers to develop value and reliability and reward them for using evidence-based care sharing best practice with clinicians

Description: -

-Outcomes-based care delivery

Critical care nursing clinics of North America -- v. 10, no.

1 Outcomes-based care delivery

Historical Development of Outcomes

As mentioned, what will be a big change is that you will naturally and automatically start working much more integrated across disciplines. Transitional points of care are critical for managing consistency of care and providing the right care in the right setting at the lowest cost. The criteria used in knowledge distillation should include perspectives of the end users e.

Value

The top seven categories of outcome measures are: 1. Christina Åkerman: I think that value-based health care as a term could be misinterpreted. HT: What are the origins of value-based health care and what challenges does it aim to solve? Health systems target outcome measures based on state and federal government mandates, accreditation requirements, and financial incentives.

Outcome

Keywords: Evidence-based practice; Journal club; Nursing. Medicare provider charge data, available on the Web site.

Value

In planning investigations, researchers must use a conceptual model to guide the research and add to the empirical and theoretical understanding of this field of inquiry.

Historical Development of Outcomes

CMS uses outcome measures to calculate overall hospital quality.
