

Remote access toll fraud - detection and protection.

North American Telecommunications Association - Why Device ID May Not Be Enough to Stop Fraud

The slide is titled "SIP Trunk-UC Workshop" and "Security - Toll Fraud Prevention". It includes a section on "Theft of Service & Toll Fraud" and a bulleted list:

- How Ingate prevents Stealth of Service and Toll Fraud?
- IP Filter Rules
 - Define only the Trusted Source IP Address(es)
 - i.e. the SIP Trunking Service Provider
 - This provides TCP/IP Layer Control

A screenshot of a configuration interface shows a list of nodes or filters. The interface has tabs for "Nodes", "Filter Rules", "Actions", and "Logs". The "Nodes" tab is selected, showing a list of nodes with their status (e.g., "Up", "Down").
