### Bang Shuo Yin

In order to achieve the research goal, proper porous structure will be initially designed, and then the optimum SLM manufacturing parameters will be acquired by orthogonal experiment. Shuo Yin was appointed Assistant Professor and Principle Investigator within the Department of Mechanical, Manufacturing and Biomedical Engineering in January 2019.

### Bang Shuo Yin

We have currently been working on several materials so far. The main drawbacks of these techniques are the limitation of manufacturing complex prosthesis and the long period of production time. Therefore, there is an urgent need for an effective manufacturing process with high controllability and repeatability in terms of reliable mechanical and morphological properties for the porous implant to treat bone defect.

### Bang Shuo Yin

In cold spray, this can be achieved by increasing either the pressure or the temperature of the processing gas N2 in this study. Finally, research and development route of an individualized porous scaffold for bone defect patients will be acquired. English Afrikaans Albanian Arabic Armenian Bosnian Catalan Chinese Czech Danish Dutch Esperanto Finnish French German Greek Hebrew Hindi Hungarian Icelandic Indonesian Italian Korean Latin Latvian Macedonian Norwegian Polish Portuguese Romanian Russian Serbian Slovak Spanish Swahili Swedish Tamil Turkish Vietnamese Welsh All Languages.

### How to pronounce Shuo Yin

These problems can, to a certain extent, be avoided with the usage of He as the processing gas. He is an awardee the Government of Ireland Postdoctoral GOIPD Research Fellowship. However, the increased gas temperature may lead to increased oxidation, nitridation, phase changes, softening or even melting of particles, as well as damage of the cold spray nozzle made of polymer.

### Bang Shuo Yin

In this research, the applicant aims to fabricate topology optimized scaffolds by SLM.

**Shuo Yin : Department of Mechanical, Manufacturing & Biomedical Engineering**

From 2013 to 2015, he worked as a postdoctoral researcher at University of Technology of Belfort-Montebiard in France and Wageningen University in the Netherland. He then moved to Dublin and was appointed research fellow in Trinity College Dublin.

**Shuo Yin : Department of Mechanical, Manufacturing & Biomedical Engineering**

He has been serving as guest editors for Journal of Thermal Spray Technology and Coatings, and reviewer of more than 30 journals. Naturally, the overall trend in cold spray industry is, therefore, to avoid using He.
