Sexual harassment by these inspectors is hardly documented. In the Alpine and Bohemian modern-day regions, proto-industrialization began by 1750 and became the center of the first phases of the industrial revolution after 1800. It was highly successful, attracting 450,000 visitors over 102 days.

Industrialization of Japan : Western Civilization II Guides

Representing the work of students from hundreds of institutions around the globe, Inquiries Journal's large database of academic articles is completely free. The Meiji leaders had resolved that their government needed to be the sole political power in the land so it could perform the urgent task of constructing a modern state.

Large gains in productivity also occurred in spinning and weaving of wool and linen, but they were not as great as in cotton. During the past several years, private Japanese companies have played a central role in developing technology to produce enzymes and antibodies, pharmaceuticals, fibers with new properties, and biomaterials. London: Maney Publishing, for the Institute of Materials.

Japan

Around the start of the 19th century, at which time the Boulton and Watt patent expired, the Cornish engineer and the American began to construct higher-pressure non-condensing steam engines, exhausting against the atmosphere. Germany's political disunity—with three dozen states—and a pervasive conservatism made it difficult to build railways in the 1830s.

The transition under globalization of the Marshallian industrial district in Italy and Japan : the case of the Prato and Bishu wool textile districts

Industrialization and other changes went along with a massive population increase that supplied cheap labor but strained resources and stability. This limitation was overcome by the steam engine.

Textiles and Industrial Transition in Japan on JSTOR

In India a significant amount of cotton textiles were manufactured for distant markets, often produced by professional weavers.

Industrial Revolution

From 1890 to 1930, new industries developed with their focus on the domestic market: mechanical engineering, power utilities, and textile.

Japan's Industrial Revolution

By the early 17th century Edo period , silk textiles were being produced in many regions for the promotion of local industry. The Industrial Revolution led to a population increase but the chances of surviving childhood did not improve throughout the Industrial Revolution, although infant mortality rates were reduced markedly.
