### U.S. Data and Statistics

The objectives of Banking Union are to break the nexus between banks and states described above, to ensure that a common high-quality supervision is applied consistently to all banks, to ensure a stable cross-border EU banking system through supranational resolution, and to build the necessary trust between member states as a necessary condition to introduce common public financial safety nets such as the European Stability Mechanism or ESM. Adopted by all United Nations Member States in 2015, the SDGs are a call for action by all countries - poor, rich and middle-income - to promote prosperity while protecting the environment.

### United Nations Population Division

There is a high potential for improvement for many Member States Figure 3. The factors limiting this potential are studied in more detail in the Staff Working Document accompanying the Single Market Strategy and the evidence presented here supports the direction the proposals included in the strategy. This section looks at trade issues and the next one will present the situation regarding investment and establishment.

### World Population Prospects

This WGEA data is collected via a census of all relevant employers, making it a robust dataset.

### Eurostat

There is surely more potential for expansion in the cross-border trading in services within the EU. Each of the models outlined have strengths and weaknesses, but to date there is no research that compares the effectiveness of each scheme. After that year, and unlike the evolution of trade in services, trade in goods within the EU has been growing slightly above GDP accounting for around 20 % of EU GDP in 2014 Figure 3.

### IATA

Why WATS is so accurate The numbers in WATS are submitted directly to IATA by approximately 270 international airlines, and include data that is exclusive to IATA. Business services, in particular professional services, are increasingly being used to differentiate products that can compete on the package of associated services after-sales service, maintenance, training, etc.
