## CHLORINE AND ITS COMPOUNDS

Hair quantity of a human is relevant to hair color thereof, and hair quantities of humans having different hair colors are different from each other markedly, for example, humans having golden hairs have 140,000 hairs on average, humans having brown hairs have 110,000 hairs on average, humans having black hairs have 108,000 hairs on average, and humans having red hairs have 90,000 hairs on average.

### The Perils of Chlorine

At the Windsor meeting both governments refused to endorse the ban on chlorine recommended by the IJC, but now the Clinton administration has changed its mind. Sodium thiosulphate increases proteolytic not unhairsty activity of the enzyme.

### Vital

Inhalation Hazard Zone C X Liquefied gas, poisonous, corrosive, n. If the chlorine dioxide concentration is too high, sodium chlorite feed is reduced; and if the concentration is too low, sodium hypochlorite and hydrochloric acid feeds are increased. Inhalation Hazard Zone B X Poisonous by inhalation liquid, water-reactive, n.

### Homemade Conditioner: A Simple and Effective Recipe for Soft Hair

Although the testes make dihydrotestosterone, most of the dihydrotestosterone circulating in blood comes from peripheral tissue conversion of testosterone. Inhalation Hazard Zone A X Compressed gas, toxic, oxidizing, n.
