## Feasibility study of a family

Other parents explained that their children started washing-up and studying without prompting. Recruitment began by emailing contact letters and consent forms to four potential faculty participants 2 men and 2 women inviting them to participate in face-to-face interviews.

## A Feasibility Evaluation of the Incredible Years® School Readiness Parenting Programme

Improving the outcomes of primary care attenders with common mental disorders in developing countries: a cluster randomized controlled trial of a collaborative stepped care intervention in Goa, India. The two children who did not participated moved to another district. Early diagnosis of HIV infection results in earlier access to treatment and reductions in HIV transmission.
