Contact • GTI

Intelligent Sensing ISA is a remote monitoring company using IoT to monitor oil and gas storage. Our mission is to help cities become smarter utilising their resources well.

## Natural Gas Powered Fuel Cells

OAG is a data analytics provider helping oil and gas companies perform more efficiently. NB: to work correctly this installer must be run from a local drive, and not a network share.

## Natural Gas Service Technician Diploma

EMXT is combining stored and real-time data into an interactive platform to manage an entire field. We also supply our own Flow Computer and Data Logger products.

## Top Oil and Gas Technology Companies

Global oil demand fell by 25% in April, but it has rebounded sharply since then, cutting its losses to just 8%.

## Top Oil and Gas Technology Companies

Customers can now experience their products virtually and digitally, but almost lifelike in a fully-immersive interactive journey. Tachyus is focusing on data, but for decision making in the oil and gas industry. Whether you need a confined space monitor or an instrument to quickly find the source of combustible gas leaks, SENSIT Technologies has the right product for you.
