2016

Historically unprecedented warming is projected during the 21st century. The blizzard had little impact from Albany on north, as there was an extremely sharp cut off to the northern extent of the snow.

1996 — Jan 19

Male, 17, surrounded by rising water and drowned.

Flooding in New York

Map of August 1955 rainfall totals for New York. Winter and spring precipitation is projected to increase in New York Figure 8. Statewide average precipitation is a little over 40 inches annually; this varies regionally, with mountainous regions of the state receiving more than 50 inches per year.

New York Water Science Center

On the 19th thirty major roadways were closed and two bridges were overrun by water. For most places the crest along the Delaware was the highest since 1955....

of January 19

The flood in the Neversink River, a tributary of the Delaware in New York, also exceeded previous flood records. Most sites at which these peak discharges occurred were within the Schoharie Creek and Delaware River basins. NOAA Technical Report NESDIS 149-NY, 4 pp.

spaceneb.us.to: January 19

The number of very hot days peaked in 1930—1934, while the number of warm nights was the highest on record during the most recent 5-year period 2010—2014.
