Answer #3 (Cont'd)

- Pharmacy consult to evaluate adequacy and safety of medication plan.
 - Prevent inappropriate medication use and simplify complicated medication regimen
- Communicate with PCP to review details of hospitalization and pending results of tests or referrals.
 - If EMR is unavailable, telephone, or fax communication will be essential to update PCP, support follow up appointments, and improve safety.
- Participate with interdisciplinary team to establish ongoing discharge plan.
 - Rationale: Discharge planner needs updated information in order to determine appropriate plan at the time of transition.

health intervention, and transitional care, are likely to dominate in a reformed health care system. The partnership has led to changes in teaching and in clinical care.

The Building Blocks Collaborative: Advancing a Life Course Approach to Health Equity Through Multi

The integration process exposed practice and service delivery gaps, duplications between sites, and policy and practice variations across departments and geographic zones.

Rural Project Summary: Project ACTIVATE (Advancing Coordinated and Timely InterVentions, Awareness, Training, and Education)

With their focus on patient-centered care, their holistic view of patients incorporating aspects of family, community, and work environments , and their emphasis on the promotion of health and well-being, nurses have a long history of providing care that is consistent with RWJF's vision of a Culture of Health. On the other hand, when contextual uncertainty is low, the organisation is predisposed to control because the problem is well understood and can be dealt with mechanistically.
