Hence, some scholars argue that only technocratic, politically insulated policymakers can manage successful stabilization ; ;. Appendix differentiates between concessional and non-concessional programs.

Case study on Inflation

One reason for the greater magnitude of supply shocks is that primary products agriculture, mining, forestry, and fishing make up a larger share of their economies.

Angola Overview

That said, the foregoing concern does not appear to be borne out empirically. Fundamental change can only happen as a result of emotional and politicized movements able to challenge the existing power structure. By modifying the baseline IV specification, they show that the baseline effect is driven a by non-concessional IMF programs, which typically demand more substantial policy reforms than concessional programs, and b by programs with more binding conditions.

Even the earned income tax credit is a subsidy to these companies so their workers are not impoverished. It might be a stretch to conclude that the election of Donald Trump represents a desire for authoritarianism. Macroeconomic stability has been restored and maintained through a more flexible exchange rate regime, restrictive monetary policy, and fiscal consolidation.

Does democracy boost economic growth?

Economic Inequality and Political Representation Focusing on the political consequences of growing wealth inequality, and asking whether the political process can ever consider all citizens as equals, Larry Bartels discussed the impact of wealth inequality on democracy. How can we account for the willingness of policymakers to take the risk and how do we explain their success.
