Machine Translation

So, for the moment I am confused. The predicted output is coming as empty.

Amazon Translate

Sir, I am a student and i am trying to translate from Hindi to English using your code. Transformers, which were introduced in 2017 in a paper by Vaswani et al.

AI & Language Translation: How to Train Your Machine Translation Engine

As of 2017, Skype the Microsoft Translate technology, which runs on neural networks, to more accurately translate audio conversations in 18 languages and textual conversations in 60+ languages.

On Learning Language

With this new approach, we achieve a translation performance comparable to the existing state-of-the-art phrase-based system on the task of English-to-French translation. Figure 2: Translation quality by using a single massively multilingual model against bilingual baselines that are trained for each one of the 103 language pairs.

How to Develop a Neural Machine Translation System from Scratch

I target to do a bi-directional LSTM but cannot find existing word data file as the source. To this end, the goal of the so-called multilingual universal machine translation, a.

Machine Learning Behind Google Translate Services

The clean datasets must be loaded and prepared as before. Unlike the traditional statistical machine translation, the neural machine translation aims at building a single neural network that can be jointly tuned to maximize the translation performance. The system is allowed to update its models

using the incoming stream of source text unsupervised adaptation , creating a better model to handle the next document.
