

# In Vitro and In Silico characterisation of a novel immunoglobulin.

University of East London - Specific egg yolk immunoglobulin as a promising non

Description: -

- In Vitro and In Silico characterisation of a novel immunoglobulin.
- In Vitro and In Silico characterisation of a novel immunoglobulin.

Notes: Thesis (Ph.D)-University of East London, 1999.

This edition was published in 1999

## A novel method for the synthesis and characterization of 10

This suggests that the expression of Rnase10 is not regulated by testosterone, but is likely to be controlled by some other testicular factors. World Health Organisation WHO has assigned this pathogen as the priority that needs new antibiotics. Superscript letters represent statistical differences among samples.

## In Silico Analysis and In Vitro Characterization of the Bioactive Profile of Three Novel Peptides Identified from 19 kDa α

Right side: electrostatic potential according to the predicted structures of the synthesized peptides. Ethical approval was issued by ethical committee of Shahed University. However, there are many problems with the use of such motifs.

## Frontiers

Cells were fixed at 4°C in 4% paraformaldehyde and analyzed on a FACSCalibur BD Biosciences, Oxford, UK using CellQuest software.

## Synthesis, characterization, in silico and in vitro biological activity studies of Ru(II) ( $\eta_6$

Proteases are known to have important roles in multiple physiological processes.

## In Silico and in Vitro Evaluation of Deamidation Effects on the Stability of the Fusion Toxin DAB<sub>389</sub>IL

The Adaptive Poisson—Boltzmann Solver APBS plugin version 3.

## Immunoglobulin fragment F(ab')2 against RBD potently neutralizes SARS

Comparison of the anti-inflammatory and anti-nociceptive effects of cortistatin-14 and somatostatin-14 in distinct in vitro and in vivo model

systems.

***In Silico* and *in Vitro* Evaluation of Deamidation Effects on the Stability of the Fusion Toxin DAB<sub>389</sub>IL**

Crystal structure of *Aspergillus niger* isopullulanase, a member of glycoside hydrolase family 49.
