## McCON: a General Contouring Program for Personal Computers

Please note that in-person registration also gives access to the online platform

## Digital Technologies for Exploring Prosody: A Brief Historical Overview

Although contour charts are usually thought of as being two-dimensional pictorial representations of topographic formations of land masses, they can also be useful in portraying data which are obtained during the course of research in various scientific disciplines and which would ordinarily be tabulated. The sharable, working version of code is not yet available, but the research group hopes to have it published soon. For the Late-breaking Abstract Submission Guidelines, click.

Contents This collection of aeronautical software consists of the following programs. A discussion of the mathematical procedure used to generate the contour maps and a detailed User's Guide is included. In addition to promoting economic opportunity in developing countries, the GSP program also supports progress by beneficiary countries in affording worker rights to their people, in enforcing intellectual property rights, and in supporting the rule of law.
