World Inventory of Plutonium and Highly Enriched Uranium, 1992

This broke down when North Korea's clandestine uranium enrichment program came to light in 2002, after which China convened the to negotiate a step-by-step process to denuclearization. Possibly derived from the Chinese SLBM. North Korea stated that this test has enabled them to confirm that its warhead can be mounted to a missile and to verify the warhead's power.

Proliferation issues related to fast SMRs

United States Environmental Protection Agency.

Plutonium and Highly Enriched Uranium 1996

The identified stockpile is between 2,500 and 5,000 metric tons of chemical weapons.

SIPRI Monograph Ser.: Plutonium and Highly Enriched Uranium 1996 : World Inventories, Capabilities, and Policies by Frans Berkhouwt, David Albright and William Walker (1997, Hardcover) for sale online

Panel 5 Report: Advanced Waste Forms. Plutonium and HEU production for weapons has been halted in the NWS, but a verified agreement banning weapons material production remains elusive: Over the past several years, progress has been made to halt the production of plutonium and HEU for nuclear weapons by the five acknowledged NWS.
