Grid Pricing of Fed Cattle

For grain fed, non-dairy type, steers and heifers the average dressing percentage is around 62% and closer to 59% for a dairy steer.

Beef Carcass Equivalent (02/15/2021)

The assorted premiums and discounts are then simply copied into the grid as shown in Table 2.

Grid Pricing of Fed Cattle

This gives producers no incentive to invest in better genetics and produce a better product. Dressed Weight Pricing When cattle are marketed on a dressed-weight basis, the cattle seller assumes the risk of dressing percentage. Anyone selling retail cuts directly to the consumer should consider comparison pricing as well.

The Basics of Pricing Freezer Beef

During this time they reach a weight of between 300 and 500 pounds. The rest of the grid is now filled in typically by just adding premiums and discounts.

Grid Pricing of Fed Cattle

In addition, packers value traits differently.

Grid Pricing of Fed Cattle

For example, one packer might not discount select cattle and another packer might not discount Yield Grade 4 as much as another packer.

Furthermore, Ohio producers must factor in the cost of a Warehouse License if storing product and either a Mobile or Temporary Food License depending on the outlet of sale. Yield grade premiums and discounts have remained relatively stable over time for all packer grids.
