**Observations on time, sacred and profane: being chronographical disquisitions on the Julian and Gregorian styles : etymological notes on the names of years, months, and days : also historical remarks on the various holy days, either fasts, or festivals in use in England; their original names, end, and use : to which are annexed tables, engraven on copper plates, with the Julian, Gregorian, and Jewish stiles parallel'd, with many other things useful for those that consult almanacks, and read foreign news**

The culling of male animals from herds as indicated by remains of animal bones points to the domestication of animals as well. Fortunately, these latter populations were sufficiently well situated by this time, and adequately armed with tools and technologies to hunker down in their various regions of the world and survive. Lake Victoria, sitting 3700 ft above sea level, is the third largest lake in the world.

SIDE BAR; ARCHAEOLOGY OF THE ICE AGE , and with it a trend toward steeper latitudinal climate gradients and increased seasonality and variability, seems to have been the climatic trend through the Cenozoic era 65 mill. Sea levels plunged by 130m.

## CHAPTER 3: HUMAN PREHISTORY

Some have argued that the dearth of evidence for agriculturally based sedentism during the Younger Dryas era possibly resulted from a reversion in settlement to coastal lowlands, where possible remains of agricultural communities now lie submerged below the sea.
