## Prevention of Infection in Patients with Acute Nonlymphocytic Leukemia by Several Drug Treatment Regimens

Red marrow contains blood stem cells that can become red blood cells, white blood cells, or platelets. It cannot be identified as an NCI PDQ cancer information summary unless the whole summary is shown and it is updated regularly. Talk with your doctor if you think you may be at risk.

### Acute lymphoblastic leukaemia (ALL)

Bone marrow biopsy To confirm a diagnosis of AML, the haematologist will take a small sample of your bone marrow to examine under a microscope.

### Acute myeloid leukemia

It is intended to help you and your family make informed decisions, together with your doctor. It is a type of external radiation that may be used to prepare the body for a when the leukemia has.

## The Truth About Leukemia in Older Adults: It's Still Treatable

People with AML may also have symptoms such as headache, fatigue, and weight loss, which are similar to other types of leukemia.

Transplantations are most successful when they're carried out on children and young people, or older people who are otherwise in good health, and when there's a suitable donor, such as a brother or sister.

### Acute Nonlymphocytic Leukemia: An Adult Cluster

See Drugs Approved for Acute Myeloid Leukemia for more information. Complications arising from infection are the leading cause of death in people with AML.

## **Management of Infections in Patients With Acute Leukemia**

But older men are more likely to develop AML than older women for unclear reasons. PDQ Adult Acute Myeloid Leukemia Treatment.

## **Periodontal Infection in Patients With Acute Nonlymphocytic Leukemia: Prevalence of Acute Exacerbations**

Leukemia may affect red blood cells, white blood cells, and platelets. For intensive treatment, the chemotherapy medications will be injected into a thin tube that's inserted either into a blood vessel near your heart central line or into your arm a peripherally inserted central catheter, or PICC.

## **Adult Acute Myeloid Leukemia Treatment (PDQ®)**

The fluid may be sent to a laboratory for testing. There are approximately 10,500 new cases each year in the United States, and the rate has remained stable from 1995 through 2005. For more information, call the Cancer Information Service CIS , NCI's contact center, at 1-800-4-CANCER 1-800-422-6237.
