### Why Facts Don't Change Our Minds

Are you a scientist who specializes in neuroscience, cognitive science, or psychology? These strategies may help open ourselves up to the facts—even when they are inconvenient.

### This Article Won't Change Your Mind

This includes skills related to thinking, understanding, learning, and remembering.

### 13 Wild Science Facts You Probably Didn't Learn in High School

This is why water is valuable to industries and in your car's radiator as a coolant. Thousands of subsequent experiments have confirmed and elaborated on this finding.

### Why We Are Wired to Connect

Our desire to hold identity-consistent beliefs often far outweigh our to hold accurate beliefs. Since of the two, Scripture speaks with greater clarity, until a satisfactory resolution can be made about the conflict, I will proceed with confidence in my interpretation of Scripture. Instead, reasoning evolved to fulfill fundamentally social functions, like cooperating in large groups and communicating with others.

### The Psychology of Fact

But then again, it is also possible, albeit very, very, very, very, very unlikely, that monkeys will fly out of my ass tomorrow. Addiction is a chronic brain disease that causes a person to take drugs or alcohol repeatedly, despite the harm they cause.

### Why People Ignore Facts

In humans, it is so big that it makes up about three-fourths of the entire brain. We have recently found that this reflex prepares us to walk into the next moment of our lives focused on the minds behind the actions that we see from others. The teacher then becomes a coach helping to teach the

12 year old and the 14 year old will reap the benefits of prosocial learning.
