Evidence

Furthermore, paracetamol-refractory subjects under conventional medical treatment with NSAIDs experienced the drug as more effective and also tended to be more satisfied with treatment than those treated with non-NSAIDs. In this way, differences in policy priorities and the organization of health care systems can be addressed.

Quality of care for hip and knee osteoarthritis at family medicine clinics: lessons from Mexico

Declaration Funding: This study is supported by grants from the Canadian Institutes of Health Research CIHR Funding Reference Number TTF-128263 and the Health System Performance Research Network Fund 06034 which receives funding from the Ontario Ministry of Health and Long-Term Care MOHLTC. Osteras N, Garratt A, Grotle M, Natvig B, Kjeken I, Kvien TK, Hagen KB. There are several studies presenting quality indicators that have been developed for measuring and improving cardiovascular disease care in Canada.

CKS is only available in the UK

One item Q20 was removed due to conflicting evidence supporting its effectiveness that emerged during the course of the study.

Quality of care for hip and knee osteoarthritis at family medicine clinics: lessons from Mexico

Despite the consumer input to the development of the QI items, it appears that some items were ambiguous and likely to be interpreted differently, particularly from the perspective of a patient or a clinician. Supplementary material Supplementary data are available at Family Practice online.

OARSI guidelines for the non

Quality of care for OA: the effect of a point-of-care consultation recording template.

Development of healthcare quality indicators for rheumatoid arthritis in Europe: the spaceneb.us.to project

It is obvious that a third generation farmer with a family history of OA of the hip in parent and grandparent should seriously consider alternative, less physically demanding work.

Development of quality indicators for hip and knee arthroplasty rehabilitation

All authors approved the final manuscript. According to the AIRE domains, all studies were clear on purpose and stakeholder involvement, while formal endorsement and use of indicators in practice were scarcely described. Although many physiotherapists claim to perform manual therapy, they are unqualified in performing the skill of manipulation without a postgraduate qualification.

RACGP

We searched the following databases: Medline, Ovid, Cochrane Library, National Guideline Clearinghouse, CMA Infobase: Clinical Practice Guidelines, TRIP database, Institute for Clinical System Improvement, ACP Guideline website, American Academy of Family Physicians, NHS Evidence - National Library of Guidelines and IMSS-Clinical Guidelines. It is surprising that a larger study to replicate these findings has not been performed to date. Both these studies demonstrated a small reduction in pain and increase in function.
