Plans

Nevertheless, the technical findings of the report confirmed the importance of technical information in political decision-making, and the study project's structure enabled the three countries to sustain cooperative development while data gaps were filled.

Aurecon

The second Community Consultation Meeting and Open House provided an update on the Study Process and presented the Phase 1 Findings, which included three Development Options for the area. Even though institutional deficiencies were great at both provincial or departmental and national levels, and the allocation of funds was centralized in all three countries, the study team did not propose setting up a tripartite authority to manage the integrated development of the river basin.

Case study 3

Since the Pilcomayo extends over such a vast area, the time and funds spent on information gathering, analysis, and planning had to be carefully minded, and conducting detailed studies for the entire basin was out of the question.

Botswana national water master plan study (uuuu edition)

A draft of the final report was presented to the coordinating commission in June of 1977. Geological Survey San Diego County Assess the extent of data necessary to create a groundwater model 1983 California Department of Water Resources San Diego County Present results of study of groundwater recharge to the aquifer 1983 California Department of Water Resources San Diego County Present results of a study of demand, past, and future 1987 U.

Sherway Area Study

Where the level of detail on various areas varied, the information was used to select the most promising areas but not published for use as

reference. Argentina has already assigned high priority to this study, while Bolivia and Paraguay are close to reaching a decision.

Galveston District > Business With Us > Planning & Environmental Branch > Documents for Public Review

Argentina named the National Institute for Water Science and Technology INCyTH , Bolivia chose the Ministry of Transportation, and Paraguay designated the Subsecretariat for Economic Affairs of the Ministry of Foreign Affairs. Cuenca del Río de la Plata, Estudio para su Planificación y Desarrollo: Aprovechamiento Múltiple de la Cuenca del Río Pilcomayo, Primera Etapa. For the lower basin, irrigation, agriculture, cattle and milk production, and agro-industrial projects were identified for further study.
