Chemical Safety Guide

Better informed and alert employees can help you identify and correct potential injury and illness hazards in your workplace. When seven or more employees are regularly transported in a van, bus, or truck, is the operator's license appropriate for the class of vehicle being driven and are there enough seats? EXIT DOORS Are doors that are required to serve as exits designed and constructed so that the path of exit travel is obvious and direct? EXITING OR EGRESS - EVACUATION Are all exits marked with an exit sign and illuminated by a reliable light source? Are all employees required to report any obvious hazard to life or property in connection with electrical equipment or lines as soon as possible? The best way to evaluate the success of your safety and health program is to have documentation of what you have done, which provides guidance on how you can make it work even better.

Pocket Guide to Chemical Hazards

This book is a hands-on reference to environmental, health and safety issues critical to the semiconductor industry. Managers, supervisors and employees are trained to understand and deal with worksite hazards.

ACS Chemical Health & Safety

In most cases, safety hazards can be corrected without financial assistance. For a more detailed description of each of these programs, please see pages 40- 42.

ACS Chemical Health & Safety

Are arms and legs kept inside the running lines of the truck? You may be able to combine safety and health training with other training, depending upon the types of hazards in your workplace. Also, OSHA's booklet, Job Hazard Analysis, may be helpful.

Handbook on Chemicals

Establish and regularly conduct a worksite analysis. You might want to start by selecting the areas that are most critical to your business, then expanding your self-inspection checklists over time to fully cover all areas that pertain to your business. ? The employer is required to report to

OSHA within eight hours of the accident, all work-related fatalities or multiple hospitalizations that involve three or more employees.

ACS Chemical Health & Safety

SPRAYING OPERATIONS Is adequate ventilation provided before spraying operations are started? Is each electrically operated grinder effectively grounded? OTHER COOPERATIVE PROGRAMS Information about OSHA's different cooperative programs is available from any OSHA Regional Office, OSHA Area Office, or by contacting OSHA's Directorate of Cooperative and State Programs at the U.
