The provisions of this plan are to be more » carried out whenever activities identified as part of the GAAT are initiated that could be a threat to human health or the environment. Metals and PCBs are the primary contaminants of concern.

The UEFPC CA, which includes the main Y-12 Plant area, is an operationally and hydrogeologically complex area that contains numerous contaminants and containment sources, as well as ongoing industrial and defense-related activities. In 1994 a strategy was developed and a specific program was initiated to implement the strategy for the terrestrial biota of the entire ORR.

The proposed action would also include construction and operationmore » of a dry cask SNF storage facility on ORR, in case of inadequate SNF storage. The environmental-monitoring criteria are described in DOE Order 450.

6.2. PRINCIPLES OF ELECTRICAL RESISTIVITY SURVEY

In the course of the last decade and a half, the RPSD designed, built, and operated 4 telemanipulators M-2, ASM, LTM, CESAR arm and operated another half dozen M-8, Model 50, TOS SM-229, RM-10, PaR 5000, BilArm 83A. Comparison of model results with experimental titration curves for contaminated groundwater alone and for soil- water systems indicated close agreement.

EVALUATING THE USE OF VERTICAL ELECTRICAL SOUNDING AS A GROUNDWATER EXPLORATION TECHNIQUE TO IMPROVE ON THE CERTAINTY OF BOREHOLE YIELD IN KAMULI DISTRICT (EASTERN UGANDA)

The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will. For example, the type of 142 18 salinity of groundwater in a given type of rock is different in depth and number of Geoelectrical layers that may be recognized within a lithological homogenous rock and also in the heterogeneous situation layers of various lithologies or ages or both may have the same resistivity and thus from a single Geoelectrical layer.

The trees were felled in a logging operation at Oak Ridge National Laboratory in a mature second-growth, mixed oak-pine forest including also *Quercus velutina*, Q.

The purpose of both studies was to evaluate and rank those specially designated areas on the Reservation that contain sensitive species, special habitats, and natural area value.
