The Jobless Negro

This is a view with which we emphatically and totally disagree, but the view must be acknowledged.

Chapter V. The Case for National Action

The overall drop in the Black unemployment rate in June was driven by women, who may have been called back to work at bars, restaurants and retail stores re-opened, reversing some job losses they suffered in March and April. From 1951 to 1963, the level of the Negro male unemployment was on a long run rising trend, while at the same time following the short run ups and downs of the business cycle. The domestic worker has loomed large among the unemployed since the beginning of the current trade decline.

Negro Unemployment: A Case Study (Hal Baron, 1963)

Families of six or more children have median incomes 24 percent below families with three. From the debating society to the general convention, the assembled negro demonstrates this.

Pamphlet: The Jobless Negro

And allowing states to administer the benefits would only open the door for more discrimination.

Tupad for jobless in pandemic

For a graphic on Black vs white unemployment: The coronavirus pandemic brought an abrupt end to the record-long U. The problem is now more serious, the obstacles greater. This will probably make his progress less sure and rapid than that of the white race; but that the tendency stated by Professor Shaler exists in the case of the negro in any different sense from what is true of other races, even our own, I do not believe.
