### Clean Water Act 20 years later

Can we afford rivers and lakes and streams and oceans which continue to make possible life on this planet? Depending on the specific location and intake layout, once-through cooling systems withdrawing many millions of gallons of water per day can, to a varying degree, harm fish and other aquatic organisms in the water bodies from which the cooling water is withdrawn. The new implemented diverse pollution control programs that addressed pollution from both point sources and non-point sources. The NPDES program is typically overseen by individual states, tribes, and territorial governments at the discretion of the EPA.

### The Clean Water Act: 40 Years Later

Pipes and other outfalls are examples of point-source pollution. Although this was not the first time the river had burned, it was the tipping point for the community, who began to press the federal government for more involvement in pollution control.
