### Research > Process > Annual reports

Institutions including national Computer Emergency Response Teams, hospitals, and national Institutes of Public Health received threat intelligence including executive briefings, threat actor descriptions, technical Indicators of Compromise, as well as guidance for applying threat intelligence to their systems and a chronology of targeted ransomware in hospitals and health clinics, to help these institutions to detect cyber criminals at an early stage and take actionable steps to improve their resilience.

### Annual Report

Our research participants are our inspiration. You can also download all previous reports.

### MTL Annual Research Report

In , he published a matching the ECVRF-EDWARDS25519-SHA512-Elligator2 ciphersuite configuration found in the latest. In publishing this, we hope to assist organisations in prioritising their security activities against contemporary offensive actors.

### Annual Report

This translation of scientific research into clinical application makes Advocate Aurora an important contributor to the advancement of medical knowledge worldwide. We continue our research partnerships with a variety of institutions including the University College London Centre for Doctoral Training in Data Intensive Science, and our membership within the UK Academic Centers of Excellence in Cyber Security Research via the UK CyberInvest scheme. This work was covered by , , , , , and .

### 2020 Annual Research Report

As time went on threat actors started using staged exploitation, web shells, and were able to bypass mitigation attempts.

### Research Annual Report 2019

We also celebrate milestones reached by our researchers.

### **NCC Group's 2020 Annual Research Report**

Other research projects are also having a global impact. Conclusions from this work formed 3 of. CVE-2020-5902 was disclosed on July 1st, 2020 by F5 Networks in K52145254 as a CVSS 10.

### **Annual Report 2020**

Kathryn Meier, Monica Kirkpatrick Johnson, and Glenn Prestwich were named fellows of the American Association for the Advancement of the Science AAAS , an honor bestowed upon AAAS members by their peers. In this case study, he went through an attack chain for an example organization that is trying to do per-namespace multi-tenancy, demonstrating how to go from pod compromise, to namespace compromise, to namespace tenant bypass, to node compromise, to cluster compromise.
