### List of philosophies

Hart's account of a rule starts with the idea of a pattern of behavior among members of a given community, and distinguishes different perspectives from which to view that pattern. In its strongest form, formalism is roughly the view that judges decide, and ought to decide, cases by appeal only to the valid law of their jurisdiction, and that they justify their decisions in those cases by constructing something akin to an Aristotelian syllogism, whereby the relevant legal proposition is the major premise, the complex statement of the facts of a case the minor premise.

There are several reasons for thinking our people apt thereto. Raz's account of authority and its place in the law is complex and embedded within a broader theory of normativity, and Postema aptly and accurately summarizes much of the voluminous secondary literature responding to various facets of Raz's views on the authority of law, particularly as an argument for positivism. Here I have touched on only the broadest themes in them; there are many other interesting twists and turns in Postema's history that merit sustained attention.
