## Clinical Trials and Human Subject Protection

For the reports from previous reporting periods, please contact.

## Selective Targeting of Virus Replication by Proton Pump Inhibitors

The ESCRT-machinery: closing holes and expanding roles.

## Institutional Review Board (IRB) Written Procedures: Guidance

By testing everyone, researchers can get a better sense of the spread of the disease. The announcement generates outrage around the world and many scientists and policymakers call for a ban on human germline, genome editing.

## Human Research Ethics Committees

In all cases, the prazoles targeted the Tsg101 UEV domain C73 residue, indicating that they inhibited Tsg101 function through the same mechanism.
