## LASIK eye surgery, Will It Work For You?

You should get the model and the FDA consumer information about it or you can look it up yourself by going to the and clicking on the model. What happens before laser eye surgery? After surgery It's helpful to keep your eyes closed for the first few hours and sleep while wearing the protective glasses provided by your doctor.

## Guide to laser eye surgery

In addition, high doses of certain antioxidant nutrients might be harmful to some. Laser eye excimer laser surgery is a treatment to correct nearsightedness, farsightedness or astigmatism. LASIK patients are able to broaden their social, recreational and career opportunities since outdoor recreational activities and dimly lit social settings are more enjoyable without corrective eyewear.

### Guide to laser eye surgery

It usually starts in our 40s, making us need reading glasses. Ask whether the contract covers medical care or surgery to fix complications that may arise and ask your insurer whether your plan covers complications from laser eye surgery. In a normal eye, the front of the eye cornea , the lens of the eye and the shape of the eye focus light to form an image on the back inside surface of the eye retina.

Filesize: 37.17 MB

Remember that the decision you make will affect you for the rest of your life.

## **What is Laser Vision Correction?**

An exam can detect early signs of eye problems that often have no warning symptoms, including diseases related to diabetes, glaucoma, and macular degeneration, at a stage when they might be more treatable. Intraocular contact lens IOL or phakic implant The intraocular contact lens is inserted behind your cornea and in front of your pupil, with your natural lens left in place. Lasik and PRK are about equally effective, so which to have depends mostly on the thickness of your cornea it should be beyond a certain threshold to qualify for Lasik and your tolerance for discomfort, since Lasik surgery may be less painful and can have a quicker recovery time.

### **High**

Implants are also more expensive, and can cost about twice as much as laser eye surgery.
