provide these economic overheads in the under-developed countries. It is currently possible to identify the main contradictions.

Governance, administration and development: making the state work

Power management usually prevails in the Russian management practice, which results in a number of problems in the functioning of communication and feedback. The ultimate aim of economic development is to create conditions of full employment of labour and other resources.

Public Sector: Another vital role of the state economic development that encourages public sector for due social welfare of the common masses.

Role of State in Economic Development

But, contrary to popular belief, there is little evidence that success in implementing governance reforms leads to more rapid and inclusive economic and social development. It assesses both traditional and new models of public administration with particular emphasis on the challenge to the centrality of the state in development and current debates about the conditions of effective governance.

Role of State in Economic Development

Make outcomes improvement goals part of the compensation framework. Thus, it becomes the responsibility of state to
